Weight Stack: 240 lb / 109 kg

Incremental Add-on Weight: 5 lb / 2.3 kg

Frame and Finish: Oversized 4x2-inch frames are 11 and 8-gauge steel and welded in all structural areas. Powder coated frames.

PRODUCT FEATURES

Independent and Converging Movement Arms

Designed to demand greater balance and core muscle engagement, the independent arm resistance and converging movement path provide a greater range of motion throughout the exercise.

Adjustable Handle Grips

Adjustable handle grips enable the exerciser to change the angle of the handles to one of five starting positions from the seated position, allowing them to push heavy loads without fatiguing wrist joints.

Ratcheting Seat Adjustment

The ratcheting, gas-assisted seat adjustment features a large, ergonomic, over-molded rubber adjustment handle, making it easy and comfortable for exercisers to get the right fit.

Angled Back Pad

The 15 degree angle of the back pad encourages proper user positioning, creating a more comfortable and effective workout experience.

Weight Tower, Shroud, and Weight Stack

The open and inviting design allows exercisers to easily access the weight stack selector pin and add-on weight lever. The 5 lb / 2.3 kg add-on weight can be engaged with a simple flip of the lever to increase the load. The shroud cap is secured with three fasteners for easy access and maintenance, and the smaller diameter cables are flexible enough to stand up to the rigors of the facility floor.

Instructional Placard

Easy-to-understand, large, text-free illustrations demonstrate correct form at a glance and a QR code links to a helpful 30-second instructional video.
