

## PRODUCT HIGHLIGHTS

The Advanced Movement Design™ of the Discovery™ Series Selectorized Line Diverging Lat Pulldown features independent movement arms and ergonomically shaped rotating handles. This allows for natural user defined movement, greater variety, and increased muscular involvement.

## DIVERGING LAT PULLDOWN-DSL0314 DISCOVERY™ SERIES

## PRODUCT FEATURES

### Independent Movement Arms

Designed to demand greater balance and core muscle engagement, the independent arm resistance and diverging movement paths provide a more natural movement through the pulling range of motion.

### Ergonomic Handle Grips

Adjustable handle grips enable the exerciser to change the angle of the handles to one of five starting positions from the seated position, allowing them to push heavy loads without fatiguing wrist joints.

### Easy-to-Use Adjustments

Precision adjustments, including highly durable, industrial-grade seat and thigh pad adjustments, make it easy and comfortable for exercisers to get the right fit.

### Weight Tower, Shroud, and Weight Stack

The open and inviting design allows exercisers to easily access the weight stack selector pin and add-on weight lever. The 5 lb / 2.3 kg add-on weight can be engaged with a simple flip of the lever to increase the load. The shroud cap is secured with three fasteners for easy access and maintenance, and the smaller diameter cables are flexible enough to stand up to the rigors of the facility floor.

### Instructional Placard

Easy-to-understand, large, text-free illustrations demonstrate correct form at a glance and a QR code links to a helpful 30-second instructional video.

## PRODUCT SPECIFICATIONS

Dimensions (L x W x H): 47 x 50 x 84 in / 118 x 127 x 213 cm

Equipment Weight: 565 lb / 256 kg

Weight Stack: 240 lb / 109 kg

Incremental Add-on Weight: 5 lb / 2.3 kg

Frame and Finish: Oversized 4x2-inch frames are 11 and 8-gauge steel and welded in all structural areas. Powder coated frames.
