

PRODUCT HIGHLIGHTS

The AMT® 783 combines essential reliability and ease-of-use with innovative design. With an adaptive stride length, this product provides exercisers of all fitness levels with a wider range of motion for an effective workout. The AMT 783 intuitively responds to exercisers' natural motion, allowing them to change their stride length for a comprehensive cardio workout - all without so much as the push of a button.

PRODUCT FEATURES

P82 CONSOLE

The P82 touch screen console not only offers a brilliant 15 in / 38.1 cm screen that is ergonomically positioned to deliver crystal-clear entertainment viewing for exercisers in motion, but when networked, is also a direct-to-exercisers communication portal allowing you an opportunity to build your brand, share information about activities and services, and strengthen the sense of community within your facility

OPEN STRIDE™

Open Stride™ is a unique feature that allows exercisers not only to dynamically adapt their stride length from zero to 36 inches (0 to 91 cm), but also to adjust their stride height from 6.8 to 10 in (17 to 25 cm), providing an infinite range of stride paths to engage several muscle groups. Open Stride™ can be adjusted from level 1 to 5 with the tactile motion controls.

HANDLEBARS FIT EVERYONE

The tapered moving handlebars provide a comfortable fit for nearly every exerciser. The stationary grip has a heart rate sensor built-in that provides monitoring and a stable, comfortable position when focusing on the lower body.

TOTAL BODY WORKOUT IN ONE PIECE OF EQUIPMENT

Exercisers can go from short stride to long stride, walking to running, and climbing to striding, allowing them to target different muscle groups. Pushing and pulling the moving handlebars will engage the upper body, resulting in a total body workout.
