

## PRODUCT HIGHLIGHTS

The classic Spinner® model, the Spinner® Shift is built to be the workhorse of your facility. It features a heavier steel frame and more adjustment options, like the fore/aft handlebar adjustments, than the Spinner® Ride. The Spinner® Shift is a great choice for facilities with 10 or more classes per week, and seeking differentiation in their well established indoor cycle offering. Available with both chain and belt drive.

## SPINNER® SHIFT

# INDOOR CYCLE

## PRODUCT FEATURES

### FLYWHEEL

The 43 lb. perimeter weighted flywheel provides a superior ride feel whether you select the true-to-our-roots chain drive or the quieter, smoother belt drive system.

### STEEL FRAME

Step up to the oversized steel frame for increased stiffness and an improved ride feel. The Spinner® Shift also adds aluminum stabilizers both front and rear for better corrosion resistance.

### DURABILITY

Durability is improved by the oversized cranks, the patented Morse taper pedal and bottom bracket interface.

### ADJUSTMENTS

Micro-adjustable fore-aft seat and handle bar adjustments, height adjustments and oversized asymmetric pop-pin knobs provide an easy-to-use and personalized fit for riders of all sizes.

### REAR STABILIZER

Thoughtful design elements, like rear stabilizer covers that protect from exerciser's cleats when stretching and nylon levelling feet, make the Spinner® Shift rust resistant and easier to own.

\* The heart rate feature is intended for reference only. They may not be accurate for every user or at every intensity and are not intended for use as a medical device.

## PRODUCT SPECIFICATIONS
