# DPL0624 Squat Machine

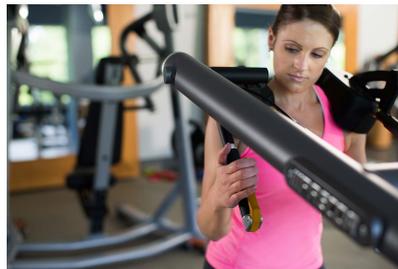

## DISCOVERY™ SERIES PLATE LOADED

### Product Highlights

The unique pivot system and open, intuitive exerciser positioning of the Discovery™ Series Squat Machine most closely mimics the muscular demands and user stabilization of a barbell squat, while also providing the control needed to master the squat movement.

### Product Features

- 1. Contoured Shoulder Pads**  
The shoulder pads are shaped and angled to more comfortably fit the user. The four-bar linkage design allows them to pivot with the user, enabling exercisers to maintain their position throughout the range of motion instead of chafing under load.
- 2. Unique Pivot System**  
The proprietary spherical bearing design of the pivot system allows for unique lateral and rotational movements that enhance core activation and stabilization, providing a more natural free weight experience while teaching the user how to perform a squat movement.
- 3. Open, Stable Exercise Platform**  
The uniquely differentiated large, open foot platform is approachable and intuitive, supporting an exercise experience that most closely mimics a free weight squat.
- 4. Simple Adjustments**  
The five start position adjustments are fingertip controlled and cover a variety of height ranges.

### SPECIFICATIONS

- Dimensions (L x W x H):** 91 x 67 x 61 in / 230 x 170 x 155 cm
- Product Weight:** 498 lbs / 226 kg
- Product Working Area (L x W):** 115 x 91 in / 292 x 231 cm
- Starting Weight:** 40 lbs / 18.14 kg
- Max Weight Load Capacity:** 540 lbs / 245 kg
- Weight Storage Horns:** 4
- Frame & Finish:** Heavy duty industrial steel tubing is fully welded in all structural areas to withstand the most severe environments. Powder coated frame.
