

PRODUCT HIGHLIGHTS

The Spinner® Chrono™ Power distances itself from the pack of indoor cycles that measure power by offering a hassle-free experience for operators, instructors and riders alike, all while staying true to the iconic feel of a Spinner® bike. With direct power measurement, patent-pending magnetic resistance, and the brightest console back light in the industry -- with no batteries to change -- the Spinner Chrono Power bike will exceed expectations.

SPINNER® Chrono™ Power INDOOR CYCLE

** The heart rate feature is intended for reference only. They may not be accurate for every user or at every intensity and are not intended for use as a medical device.*

PRODUCT SPECIFICATIONS

Dimensions: 48 in x 20.4 in x 49.5 in (122 x 52 x 125.7 cm) cm
Equipment Weight: 110 lb / 50 kg
Power: Self-powered
Flywheel Weight: 26 lb / 11.8 kg
Max User Weight: 350 lb / 158.7 kg

PRODUCT FEATURES

DIRECT POWER MEASUREMENT

We raised the bar on accuracy and reliability by putting the strain gauge power sensor directly on the resistance system. The sensor is protected from shoes and sweat, and directly wired to the console to eliminate wireless pairing, the need for batteries or manual calibration.

MAGNETIC RESISTANCE

The patent pending resistance mechanism delivers an equal increase with every turn of the knob without sudden jumps in resistance. The unique caliper design specifically accommodates the heavy perimeter weighted flywheel that delivers the iconic Spinner® feel.

TIMING BELT DRIVE

Designed with a Kevlar® reinforced, cogged timing belt for more efficient power transfer from the rider so every watt counts. Our lowest maintenance belt yet features a 10-year warranty.

SELF-GENERATING POWER

Say goodbye to batteries. The generator drives the power measurement sensor and console backlight and keeps the console on for three minutes after you stop pedaling so you can review and download your performance data.

ALUMINUM FRAME

The all-aluminum frame features rounded tubing to shed sweat and offers the best corrosion resistance. The stamped frame elements shield and protect components while giving a high quality design appearance.

Drive Options: Kevlar® reinforced, cogged timing belt

Resistance System: Magnetic

Console: Spinner® Power Console (included)

Accessories: Integrated Reading Rack, Accessories Holder, Optional - Cable Management

Warranty: Visit www.precor.com for warranty terms.
